

ANNOUNCING

New Water Meter Reading & Leak Detection Technology with plans for completion in early 2019

BENEFITS

Eliminates intensive, manual labor meter reading.

-

Provides efficient data, useful for detecting water loss and leaks in the system which will result in water and cost savings.

-

Detects continuous leaks in a customer's water service.

-

Securely transmits water usage remotely to data collection units in the vehicle/office.

-

Increases daily meter reading capacity.

-

Reduces pollution from less vehicle drive time.
